

Job Title: Line Maintenance Controller (Boeing)
Reports to: MCC Manager
Department: Maintenance Control Centre, Head Office, Swords, Co Dublin
Shift Pattern: 12 Hours Shifts Day 0700-1900, Night 1900-0700

Line Maintenance Controller (Boeing)

Key Responsibilities:

- Proactively monitor and control the technical operation from within the MCC to ensure safety and operational integrity is maintained
- Track and control aircraft defects and formulate plans to ensure timely rectification
- Provide instant technical assistance and direction to flight crew and line engineers
- Identify recurring defects and trends and construct rectification plans including in-depth troubleshooting for rectification
- Liaise with different departments and MRO's for service recovery
- Coordinate the recovery of AOG aircraft
- Formulate and implement plans for service recovery after technical delays or service failures
- Represent MCC's interests with other departments, aircraft manufacturers and other suppliers
- Shall maintain competence on the basis of continued education and training in their area of responsibility. The company will facilitate this process

Job Requirements:

- Hold an EASA Part 66 B1 and/or B2 Licence
- Preferable but not a requirement to hold a type rating on the B757-200 and/or B737-300/400/500 with recent experience
- Experience as a licensed aircraft engineer with broad exposure in defect trouble shooting on the B757 & B737
- Proven experience in an operational, line maintenance or maintenance control environment
- Sound analytical & problem solving skills
- Self-motivated, proactive, able to work / resolve issues independently and make sound decision under pressure
- Excellent interpersonal and communication skills, able to collaborate with all levels of parties throughout the organisation, both internal and external
- Willing to work on shift and perform overnight duty
- Experience in using AMOS
