

Job Title: Technical Services Engineer – Powerplant Specialist
Reports to: Technical Services Manager
Department: Technical Services Department
Base: Dublin or Shannon
Working Hours: 09.00 – 17.30, Monday - Friday

Based in the Technical Services Department and assisting in the Continuing Airworthiness Management of the ASL Airlines Ireland fleet, specialising in the Powerplant area.

The ideal candidate will;

- be an experienced Technical Services Engineer or EASA Part 66 licensed Aircraft Engineer or Aeronautical Engineering Graduate.
- technical knowledge, experience with borescope report interpretation and also experience with workscope development on the following engine types, or equivalent types, an advantage: PW100 turboprops, CFM56-3, PW2000 and RB211-535.
- will have a good appreciation of the CAMO responsibilities required by EASA Part M.
- have knowledge of a current aircraft maintenance planning system.
- be proficient in Microsoft office products.
- shall maintain competence on the basis of continued education and training in their area of responsibility. The company will facilitate this process.
- must be eligible to live and work in the EU

Closing date for written applications is 30th April 2019.
