

Job Title: Technical Services Engineer - Avionics

Reports to: Technical Services Manager

Department: Technical Services Department, ASL Airlines Ireland Head office, Swords, Co Dublin

Working Hours: 09.00 – 17.30, Monday - Friday

Reporting to the Technical Services Manager, the Technical Services Engineer Avionics will support the Continuing Airworthiness Management activities for the fleet.

Primary functions include;

- Monitor industry mandates for Avionic equipment and propose solutions
- Liaise with Design Organisations to develop modifications
- Assist with AD/SB reviews
- Assist with Maintenance Programme creation and development
- Maintenance Planning oversight
- Reliability oversight
- Liaising with third party sub-contracted CAMO organisations
- Inter-departmental communications on fleet Technical Services issues
- Aircraft acquisitions/transitions/introduction support

The ideal candidate must;

- have a recognised aircraft engineering qualification and have good knowledge of Avionics.
- have a good knowledge of Maintenance Programmes and CAMO activities.
- Possess a sound knowledge of airworthiness regulations, such as EASA Part-M / Part-145, Part 21 and STC's.
- Knowledge of a recognised aircraft maintenance and engineering computer system such as AMOS, OASES or TRAX would be an advantage.
- needs to work well within a team in a busy office environment
- Hold an EDCL or possess sound knowledge of basic computer programmes such as MS Word, Excel, Access and Outlook.
- shall maintain competence on the basis of continued education and training in their area of responsibility. The company will facilitate this process.
- Must be eligible to live and work in the EU

Closing date for all written applications is 27th September 2019
